

Ye HTML aur JavaScript code ek web page ko represent karta hai, jismein ek registration form aur ek login modal hai. Is code mein Bootstrap framework ka use kiya gaya hai, jisse web page responsive ho jata hai.

Code ka structure:

1.HTML head section mein various CSS and JavaScript files include kiye gaye hain. Bootstrap CSS aur JS files, font CSS, jQuery, aur custom CSS files include kiye gaye hain.

2.Agar URL mein parameter w set hai, toh ek JavaScript alert box display hoga, jismein URL se aaye hue message (\$_GET['w']) dikhega. Yeh possibly kisi error message ko display karne ke liye hai.

3.JavaScript function validateForm() hai, jo registration form submit hone se pehle form fields ki validation check karti hai. Agar koi validation error hoti hai, toh alert box show hota hai aur form submit nahi hota. Validations include:

- Name field must not be empty.
- College field must not be empty.
- Email field must contain a valid email address.
- Password field must not be empty and must be between 5 to 25 characters long.
- Confirm password field must match with the password field.

4.HTML body section mein web page ka content hai.

- Header section mein ek logo aur "Signin" button hai, jo ek modal ko open karta hai. Modal, login form ko display karta hai, jismein email aur password enter karne ka option hota hai. Login form ka action login.php page par redirect karega.

- Web page mein ek background image hai, aur ek registration form hai, jismein user apna naam, gender, college, email, mobile number, password, aur confirm password enter kar sakta hai. Form ko submit karne par sign.php page par redirect karega.

- Agar URL mein parameter q7 set hai, toh ek error message display hoga (red color mein).

5.Footer section mein "About us", "Admin Login", aur "Feedback" ke links hai.

6.Admin login ke liye ek login modal hai, jismein admin user id aur password enter karne ka option hai. Admin login form ka action admin.php page par redirect karega.

Ye code ek basic web page hai, jismein user registration aur admin login ke liye form hai. Form fields ko validate karne ke liye JavaScript ka use kiya gaya hai aur styling ke liye Bootstrap framework ka use kiya gaya hai.
